Comments: (If possible, please reference section and/or page number in document if applicable.)

First of all, we do not believe that Nuclear waste should be produced FOR ANY REASON!! There is no need great enough to risk the dangers involved! You will pollute this earth, eventually!

Second, any state that produces Nuclear waste material should provide a repository for this material within its own borders - or they should not be permitted to produce it at all!

Third, Nevada, the third worst earthquake state, should not have to take in everyone's waste material. Before September 11, 2001, the transportation of this waste to Nevada was already too dangerous, but now in this terrible time of terrorism, it is unthinkable that you would want to transport this waste for long distances. We see only eventual tragedy if this practice continues. There has been and is now no safe method of transporting nuclear waste - and what a target the nuclear plants are to the terrorists! The transport trucks and trains would also be great targets for them!

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible, then secure with tape.
